A note about two Beautiful ingredients; Phenoxethanol & Ethylhexylglycerin. Some Beautiful products contain a very small percentage of these two synthetic preservatives. These two ingredients are used instead of using Parabens, which are known to be dangerous Endocrine Disruptors. If Phenoxethanol & Ethylhexylglycerin are not refined, they can contain some dangerous sub-ingredients, such as; 1,4 Dioxane, which is a proven Carcinogen. **Both the Phenoxethanol & Ethylhexylglycerin in Beautiful Skin Care products are ultra-refined, and have been third-party lab tested to show they do not contain any dangerous ingredients.** Most skin care lines do not refine or test these two ingredients.

Phenoxyethanol is chemical found in Green tea. Although synthetically created in a lab, it approved world-wide & does not release formaldehyde. Further studies and accumulated safety data have shown that it is practically non-toxic via skin application.

Ethylhexylglycerin is derived from Coconut & Natural grains, however it is synthetically altered for skin care products. Ethylhexylglycerin is used in bath products, body & hand products, cleansing products, deodorants, eye makeup, foundations, hair care products & suntan products.
